

SUCTION PoolCleaner™ FEATURES

The PoolCleaner™ is made in the USA

Great Coverage- Spends more time in the shallow end than other cleaners due to Programmed Steering .

Patented Power Adjusting Turbine maximizes the suction from your pump. This allows the cleaner to run at lower suction.

Patented Tire Tread Design allows the PoolCleaner™ overcome obstacles such as main drains etc

Robust- Internal gears never wear.

Wide vacuum path with substantial clearance under the cleaner.

Automatic bypass valve not only regulates to ensure optimal flow but also snaps into an completely open position if the cleaner is clogged (by a toy etc) preventing your pump from running dry. The valve must then be manually reset.

Comes in two models: 2 Wheel and 4 Wheel.

Installs quickly and easily with no tweaking necessary.

Highest quality hoses.
